Hose - Tech Info**High Pressure Hose**

Power Steering Hose is an 1-Wire Braid Cloth design that utilizes a chlorinated polyethylene (CPE) core with a steel wire braid as reinforcement. The outer cloth braid provides addition abrasive and heat protection. The design of the tubing allows it to be oil and heat resistant within the operating temperature range of -40° F to 225° F for water and glycol solutions. The operating pressure for this hose design ranges from 2,250 PSI for -6 hose, to 1,500 PSI for -12 hose. These specifications meet the standards of SAE 100R5 requirements. The hose is recommended for high temperature, medium pressure hydraulic applications that use petroleum or phosphate base fluids such as with power steering systems. It can also be used with any application using hot oil, water or air.

Push-Loc Hose (No Temp Rating)

Push-On Hose is constructed of a chlorinated polyethylene (CPE) core that is layered with a black textile braid for reinforcement and a black CPE elastomer cover for abrasive protection. Its rated maximum operating pressure is 250 PSI. The design of the hose allows for ease of installation through the use of barbed push-loc hose ends and specialized clamps (see page 27). Recommended applications include fuel lines, lubricant-oil lines, air hoses, and coolant hoses. In some cases the hose may require a flat spring to be inserted to prevent collapsing.

Braided Hose

Hose consists of PTFE smooth bore with conductive tubing and a .030" thick wall with a protective over-braid of 300 series stainless steel wire. The design of our hose allows for a temperature range of continuous service from -65° F to 450° F and an intermittent service range of -100° F to 500° F. The operating pressure for our hose is as high as 3,000 PSI, with a burst rating of 12,000 PSI. Our hose meets SAE 100R14 specifications, which allow it to be an excellent choice for medium pressure applications and for use with fluids that are corrosive to rubber such as brake fluid and gasoline.

Performance Flex Hose

Performance Flex Hose is a multi-layered design that has a Core tube of chlorinated polyethylene (CPE), with an embedded steel braid for strength and an external stainless steel braid for abrasion protection. The flex hose is capable of withstanding a temperature range of -40° F to 300° F with an operating pressure rating of 250 PSI, and a burst rating of 1500 PSI. Recommended applications include low to medium pressure systems that use coolant, air, fuel and oil such as radiator systems, vacuum lines, fuel lines and oil lines.

Internal Hose Support Spring

Can be used with stainless steel, Performance Flex, Race-Lite and Push-Loc hose. It provides extra support for high vacuum applications.

PART NO.	SIZE	O.D.
SPR-8	-8	.44" O.D.
SPR-10	-10	.60" O.D.
SPR-12	-12	.73" O.D.
SPR-16	-16	.94" O.D.
SPR-20	-20	1.190" O.D.

NOTE: Stainless Steel CPE hose *does not* meet the SAE marine specifications for Coast Guard approval and should not be used for marine applications other than racing. This hose is *not* for power steering, hydraulic impulse applications or compatible with brake fluid.

Our **Hose** assemblies utilize our **Hose** and stainless steel fittings to provide flexible high pressure lines that are resistant to expansion and high temperature ranges. Our assemblies can be ordered on pre-determined sizes or be customized in length and fitting sizes to fill your application needs. When placing your order use the Part Number listed below for Steel ends. For Aluminum ends, add "D" to the end of the P/N. For Stainless Steel ends add "SS" to the end of the P/N.

Note: On -6, -8, -10 and -12, the inserts are Brass or Stainless Steel ONLY.

FS-20	1-1/4"
FS-24	1-1/2"

(Available in Silver and Black)

Firesleeve is made from a high bulk fiberglass material that is then braided to make a hollow sleeve. This technique allows the finished coated product "give," and be slightly expandable where and when necessary. It is coated with a thick coating of iron oxide (FeO) silicone rubber. This product is rated for 500° (260°C) of continuous exposure. Product can be used for short periods of time at higher temperature ratings, (2000°F for 15-20 minutes and 3000°F to 15-31 sec). Product is highly impervious to most liquids, this includes those that are hydro carbon based. And retains its functionality even after being under water for more than 12 hrs. Fire Sleeve may be installed over a wide variety of items and materials. A few such items would be hoses, cables, tubing and or pipes. Due to its capabilities, it is a good choice for use where you might be exposed to items such as, molten metal, radiant heat, abrasive surfaces, corrosive materials and liquids and electrical. Our Fire Sleeve is available in the following sizes: 1/4", 3/8", 1/2", 5/8", 3/4", 1", 1-1/4", and 1-1/2".

And retains its functionality even after being under water for more than 12 hrs. Fire Sleeve may be installed over a wide variety of items and materials. AN. & NPT. Size Chart

AN. FITTINGS MEASURE TABLE

Use the figures to the right to determine the AN thread size before ordering. The chart at the left shows the corresponding metal tube outer diameter and thread size for each size.

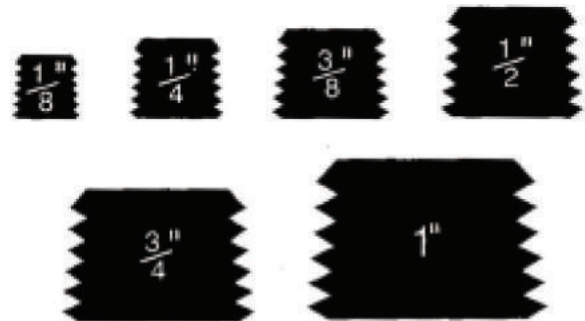

AN SIZE	METAL TUBE O.D.	THREAD SIZE
-3	3/16"	3/8"-24 UNJ
-4	1/4"	7/16"-20 UNJ
-5	5/16"	1/2"-20 UNJ
-6	3/8"	9/16"-18 UNJ
-8	1/2"	3/4"-16 UNJ
-10	5/8"	7/8"-14 UNJ
-12	3/4"	1-1/16"-12 UNJ
-16	1"	1-5/16"-12 UNJ
-20	1-1/4"	1-5/8"-12 UNJ

NPT THREAD SIZES

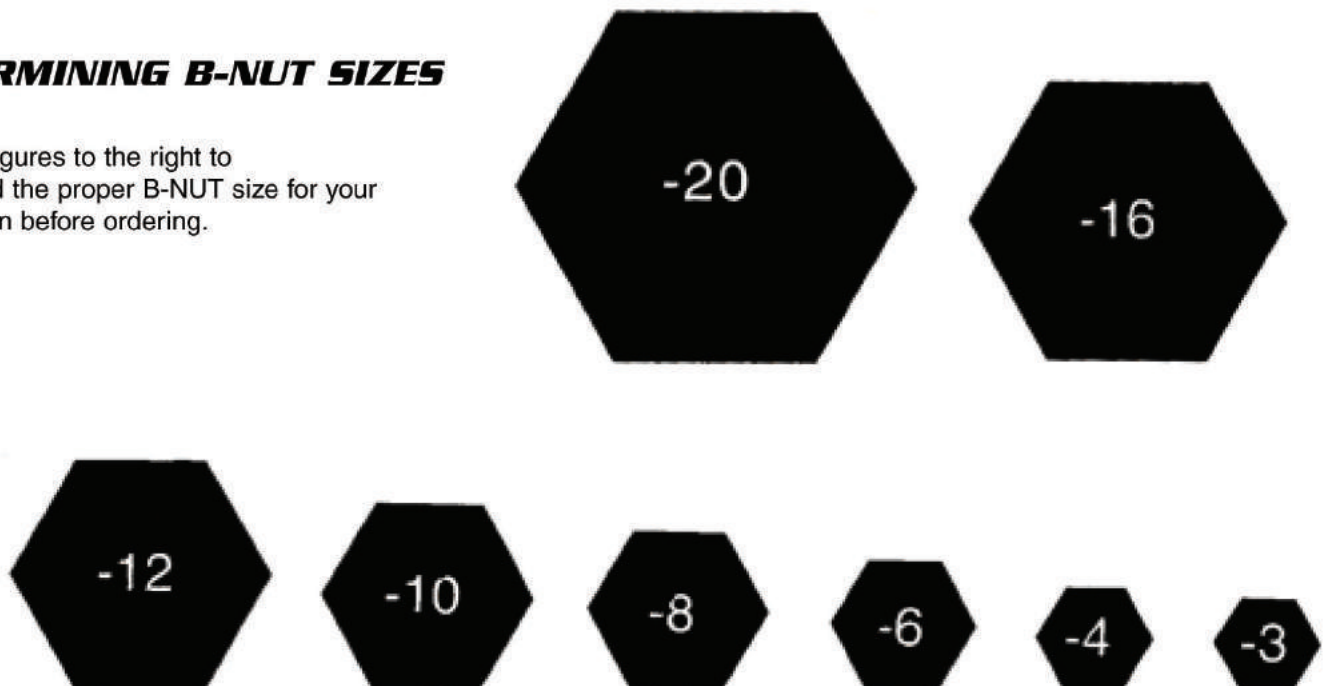

Use the figures to the right to determine the NPT thread size before ordering. The chart at the left shows the corresponding thread size, threads per inch and inner diameter.

PIPE THREAD SIZE	THREADS PER INCH	FITTING I.D.
1/8"	27	1/8"
1/4"	18	1/4"
3/8"	18	3/8"
1/2"	14	1/2"
3/4"	14	3/4"
1"	11-1/2"	1"

DETERMINING B-NUT SIZES

Use the figures to the right to determine the proper B-NUT size for your application before ordering.

Bonaco, Inc warrants that said product will be free from defects in materials and workmanship for 90 days from the date of the original purchase, and this warranty is limited to replacement of parts. This warranty shall not exceed the original purchase price of the goods, nor shall Bonaco, Inc. be responsible for unusual, incidental, or consequential damages. Any defective parts should be returned to the Dealer where purchased was made for any warranty adjustment. In the event the customer cannot get satisfaction from the Dealer, He may contact Bonaco, Inc. directly, for a RMA number. The Customer will then ship the item(s) postage paid, along with the bill of sale or proof of purchase to:

Bonaco, Inc.
1864 W. 11th St. Unit I
Upland, CA., 91786

This warranty does not apply to any product subject to damage in transportation, accident, misuse or abuse following the date of original purchase.

Waiver of Liability and Indemnification Agreement

Inasmuch as Bonaco, Inc. has no prospect to supervise the manufacture, installation or maintained of the parts supplied by it, not the opportunity to participate in the design of manufacture of the various parts of automotive, high performance, off-road vehicles, motorcycles, competition marine, marine, certified aircraft, homebuilt aircraft in which the parts are utilized, the purchaser by placing and accepting said merchandise from Bonaco, Inc. agrees that all materials purchased will be used solely at the purchaser's risk and that the purchaser will indemnify and hold Bonaco, Inc., and its owners and employees, free and harmless from all loss, liability or damage resulting from claims brought by reasons of any alleged failure or defect of any part or parts supplied by Bonaco, Inc.
